H&H Custom Woodworks Cabinetry Process

Step 1: Initial Consultation

We begin with a personalized meeting with the customer or builder to explore design inspirations. Together, we'll select the perfect door styles, wood species, and finishing types/colors that reflect your vision.

Step 2: Detailed Estimation

Based on our discussions and preliminary drawings, we'll prepare a comprehensive estimate to ensure transparency and clarity throughout the process.

Step 3: Finalization & Production

Once the job site is prepared, we will conduct precise field measurements to finalize designs and quotes. This information is then sent to our shop for meticulous production.

Step 4: Finishing Options

After production, we offer flexible finishing options: choose between our in-house finishing or onsite finishing following installation to suit your preferences.

Step 5: Delivery & Installation

Our team ensures timely delivery and expert installation of your cabinetry, transforming your space with precision and care.

Step 6: Quality Assurance

We conduct a thorough post-installation quality control walk-through, followed by a final punch visit to address any adjustments. Hardware installation will be completed after finishing to ensure a flawless look.
